## Project rule

A **personal computer**, often referred to as a **PC**, is a [computer](#) designed for individual use.<sup>[1]</sup> It is typically used for tasks such as [word processing](#), [internet browsing](#), [email](#), [multimedia playback](#), and [gaming](#). Personal computers are intended to be operated directly by an [end user](#), rather than by a computer expert or [technician](#). Unlike large, costly [minicomputers](#) and [mainframes](#), [time-sharing](#) by many people at the same time is not used with personal computers. The term [home computer](#) has also been used, primarily in the late 1970s and 1980s. The advent of personal computers and the concurrent [Digital Revolution](#) have significantly affected the lives of people.
